Some say that the mighty James Brown has a bastard grandson near Barcelona; and we're starting to think it's true, because RJ. Sinclair, Tokyo's frontman is, absolutely, the craziest guy we've ever seen onstage. And this has proven to us that punk music and soul music are so close to each other. In terms of music, we can relate them to The Sonics, MC5 or Sly And The Family Stone; in terms of aesthetics, we would say The (International) Noise Conspiracy or The Make Up. But Tokyo Sex Destruction go far beyond that, because they are even wilder and more sexual live onstage and on record, and because their lives turn around the philosophy of the liberation group The Black Panthers and the commandments of The Red Soul Communittee.

Their live appearances with the Tight Bros., The Mooney Suzuki, The Fleshtones, Standstill, Zen Guerrilla or their yet legendary show at the Sant Feliu Hardcore Fest 2002 have proven that only they know how to deal with the cliches of rock and roll, leading them to an almost esoteric, yet elegant way to perform live, controlling the situation and seducing the audiences night after night. Garage, Soul and Punk united to recover the true r'n'r live spirit. We're not wrong; check them out live and you'll agree!
