Selling points

-Produced by Santi Garcia (Tokyo Sex Destruction, Standstill, The Unfinished Sympathy, Favez, One Man And His Droid,...) at Ultramarinos Costa Brava Studios.

-Second album after "Principal Primera" (BCore, 04), and fourth release after singles "Sagrada familia" (Modern city Records, 05) and "Sobremesa" (Trece Grabaciones, 05)

-Features ex Aina frontman Artur Estrada and ex Shanty rd. Wences Aparicio plus Albert Guardia (also with The Moon Men)

-Have toured Europe with Washington DC band Just A Fire, and have played several times in Spains featuring great performances at Festimad or Sant Feliu Fest.

After the powerful "Principal primera" ('04), these ex-members of such acclaimed bands as Aina and Shanty Rd. present their second album "Juego Entrópico" ("Entropic game"). This time everything sounds clearer, the compositions are richer in details and the lyrics (Artur Estrada is becoming one of the best spanish punk-poets) are more brilliant than ever. After their successful european tour with exHoover Just a Fire, and the release of two vinyl seveninches by Modern City Records (France) and Trece Grabaciones (Spain), the band has learnt how to put together their powerful rythm base with Superchunk-inspired guitars , absolutely unique vocals armed with harmful and super-clever lyrics and percusión arrangements.

If you want to hear good emotive indie sung in spanish, you must try with this amazing Barcelona power-trio.
