8. Medio Cielo de Revolución
9. A la Tercera Va la Vencida
10. Veo al Diablo

Selling Points:

- Produced by Santi Garcia at Ultramarinos Costa Brava Studio.

- Fourth reference after the EP "The Only One" (H-Records, 04) and the albums "When shining blue" (Corea Discos, 06) and "En Ningún Lugar" (BCore, 08)

- Their previous album was released in Japan, and their visit to 2010' SXSW festival in Austin, Texas are pushing them forward to the international market.

How would it be the pop and psychedelia of The Beach Boys, Os Mutantes or Love in the year 2010? Charades have the answer. After some months diving in their own revolution and the quest for total freedom, Charades have come back, proving that the promises made in "En Ningún Lugar" (BCore, 08) are true and strong. After the great response that album had, with tons of excellent reviews, international releases and dozens of gigs, this is one of the most desired albums of the year. But nobody should expect the formula to be repeated; "Revolución Solar" sounds more Charades-like than ever, but in a radically different and new way as we had never heard before.

This new album features again the values of the '60s music: imagination, freedom, beauty, love and experimentation. But we are in the 21st century, and even though their influences and taste are crystal clear, you won't find here any revival, nor pop, rock or folk mimesis. "Revolución Solar" is a psychedelic pop album, tribal, deep and beautiful, where they have taken a bit of all of their influences to build a wonderful album from the beginning until the end. Strange and crazy beats mix up with precious and distinguished melodies; all kinds of synthesizers interact with acoustic guitars, organical percussions surrounded by a cloud of delay effects, and the lyrics (more sincere, painful and smarter than ever) just turn around our heads. Charades experiment, build and deconstruct as they feel it's right, with the only goal of making perfect and moving pop songs. Produced by Santi Garcia (like their two previous albums), these ten songs come to make a better world for us, so let's give a welcome to the Solar Revolution!
