**Rate:** Rate C

Ramon Rodriguez has had one of the most prolific times of his career as a musician in the last two years; in 2008 he started his new project The New Raemon after years in front of Madee, with the debut album "A propósito de Garfunkel" (BCore/Cydonia, 08) had an unexpected success that pushed Ramon to work hard as never before. In a short time he had already released his second record, this time a 10" EP "La invasión de los ultracuerpos" (BCore/Cydonia, 09), with some new tracks and outtakes. And before we had realized, he had recorded a new album that later on 2009 would be considered one of the best of the year: "La Dimensión Desconocida" (BCore/Cydonia, 09). And it was followed by another EP, this time in the shape of a 12" called "Cuaresma" (BCore/Cydonia, 10), that would be focused on covers by other artists, a discipline that Ramon would adopt since that moment.

As these complementary releases were pressed on vinyl exclusively, this CD has the mission to gather all these songs and put them together as a culmination of these intense two years of music. And, of course, features even more new tunes, some interesting covers, remixes and collaborations that will be only featured on this CD.
